Solution for your academy project analysis

We strive to provide the best and optimal results according to your request 🙂

Selengkapnya

{What can we do}

Face Recognition
Deteksi wajah secara realtime

Object Counting
Melakukan object counting secara realtime

Optical Character Recognition
Deteksi dan ekstraksi dokumen, text, id card dan lain-lain

Object Detection
Deteksi dan klasifikasi object secara realtime

Image Classification
Klasifikasi image berdasarkan label yang sudah ditentukan

Forecasting
Analisa data time series menggunakan berbagai metode forecasting

Classification
Klasifikasi data tabular menggunakan berbagai metode machine learning

Clustering
Klasterisasi data tabular dengan label yang sudah ditentukan

Data Mining
Scraping dan collecting data menjadi data yang siap digunakan

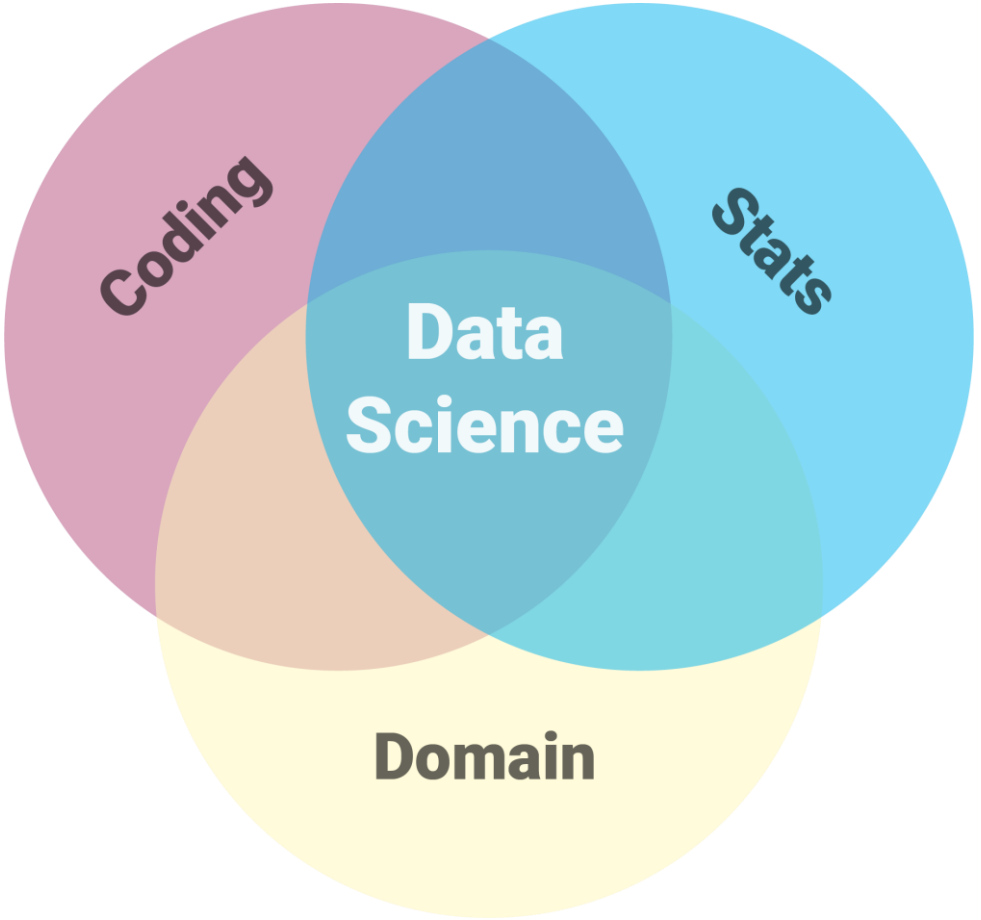
Awesome! How to make it tho?

We Need Data!

And Skills!



And Workflow!

Let's Code!

Bonus Tips!

For learners

- Do a lot of experiments
- Copy other people's work (and try to understand it of course...)
- Mastering data science workflow is a must
- Learn exploratory data analysis
- Learn maths (lol trust me on this)

That's all folks!
